

A PERIODIC TABLE OF VISUALIZATION METHODS

C continuum	Data Visualization Visual representations of quantitative data in schematic form (either with or without axes)										Strategy Visualization The systematic use of complementary visual representations in the analysis, development, formulation, communication, and implementation of strategies in organizations.	G graphic facilitation					
Tb table	Ca cartesian coordinates	Information Visualization The use of interactive visual representations of data to amplify cognition. This means that the data is transformed into an image, it is mapped to screen space. The image can be changed by users as they proceed working with it										Metaphor Visualization Visual Metaphors position information graphically to organize and structure information. They also convey an insight about the represented information through the key characteristics of the metaphor that is employed					
Pi pie chart	L line chart	Concept Visualization Methods to elaborate (mostly) qualitative concepts, ideas, plans, and analyses.	Compound Visualization The complementary use of different graphic representation formats in one single schema or frame	Me meeting trace	Mm metro map	Tm temple	St story template	Tr tree	Ct cartoon
